# SIX SUPERB NEW PATENTED VARIETIES

Patented because they are outstanding and a big advance in their various color classes. Because of the patents no grower other than Carl Salbach has a financial interest in these varieties, so he is free to fix the prices in keeping with the amount of stock available. By careful growing he has increased his stock rapidly and therefore is offering them at much more attractive prices than last year.

We have been granted permission to sell these varieties during the 1941 season, using a stock supplied by Mr. Salbach. No small bulbs or bulblets for sale. Prices are the same on all six. Large, each \$1.00; medium, each 50c. Special Group Offer, one large bulb each six patented varieties—California, Grand Opera, Helen of Troy, King of Hearts, June Bride, and Sir Galahad—separately labeled, for \$3.50. One medium size bulb of each, separately labeled, \$1.75.

**CALIFORNIA**, An immense deep geranium pink that is simply breath-taking, almost a self color, except for a slightly deeper pink blotch in throat. Blooms are well expanded, are of heavy substance and are slightly ruffled. Plants make vigorous growth and are tall with long flower spikes, six to eight blooms open at one time, floret measuring  $7\frac{3}{4}$  inches.

**KING OF HEARTS**. Perhaps the largest of all gladiolus and yet not the least bit coarse. The flower stalks are not thick, but are strong and wiry, adding to the grace of this fine new variety. Blooms are of heavy substance, and perfectly placed with eight open. The color is a light coral red with light carmine line in throat.

**JUNE BRIDE**. Stately and beautiful, this well named gladiolus reminds one of a queenly bride. A color combination that is very appealing. Clear light yellow with soft red blotch on lower petals.

**HELEN OF TROY**. A mammoth gladiolus in very pleasing blend of apricot and pink. Tall and stately, long flower spike, big wide-open blooms of heavy substance, perfectly placed. Color soft light apricot with a smoky blotch of brown. Florets from 7 to 8 inches in diameter, was champion spike of Oregon show 1940 and at eastern New York show was division champion.

**SIR GALAHAD**. A study in contrast, for the purity of its soft creamy yellow is enhanced by its diamond shaped blotch of rich crimson. Large blooms are perfectly placed and of heavy substance.

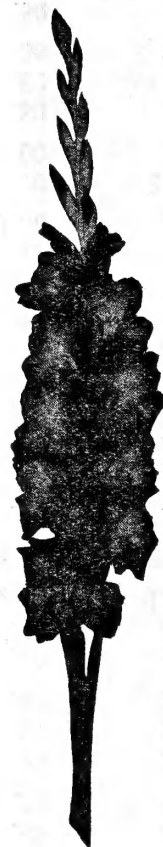

**GRAND OPERA**. Definitely one of the most sensational gladiolus ever offered, for it not only sets a new standard for size, but has beautiful form, as well as an appealing color. This was the largest in our field the past year, more than six feet tall, ten blooms open, bottom floret  $8\frac{1}{2}$  inches and next floret 8 inches. Color is between LaFrance and geranium pink, soft, but very clear in tone.

**BADGER BEAUTY (KRUEGER 1941)**. Many a lavender colored glad has had its advent since Coleman introduced his variety, Minuet. Those who try Badger Beauty will find a glad of identical color both in sheen and tone, but more beautiful because of its pure white throat and more informal placement. Growing in the field it has never exhibited a crooked spike, nor has its color been marred by flecking. Mature bulbs produce spikes of a 20 inch flower heads, that carry 18 buds, of which six 5-inch flowers open in the field. Badger Beauty has never been put in competition, but it received more than usual attention at the 1940 Wisconsin show. I am sure it will become popular both as an exhibition and commercial variety. Price per bulb, large \$4.00, medium \$3.00, small \$2.00

**GEM (KRUEGER 1940)**. This pure pink gem with its friendly and pert appearance is an outstanding introduction. A tall medium decorative and an excellent propagator. Price per six, large \$1.50; medium \$1.00; small 50c.
